Technical Skills

- Python | Java | SQL
- PySpark | Pandas | Azure Data Factory | Flask
- Snowflake | Databricks | Microsoft Azure
- RESTful APIs | Data modeling | ETL/ELT pipelines | Data warehousing

Work Experience

Digital Assurance & Transparency Intern

PricewaterhouseCoopers | Des Moines, IA

June 2022 – August 2022

- Audited client's key reports by analyzing underlying SQL query logic, validating over fifty reports our external audit team relied on
- Worked with Global 500 Client to perform audit of IT infrastructure and applicable databases, operating systems, SQL, Oracle, and SAP logs
- Analyzed key domains of client's information technology general controls (ITGCs); including access to programs and data, program changes, and computer operations controls
- Evaluated client's automated controls and documented their effectiveness and completeness
- Documented benchmark and baseline testing procedures and their outcomes for key reports and ITGCs
- Utilized PwC Connect (Project Management software) and Aura Platinum (Audit Tracker) to manage documentation upload and to track multiple engagements

Small Business Owner

Auto Revivals | North Liberty, IA

June 2022 – Present

- Established a mobile auto detailing business and broke even within a month by utilizing organic marketing
- Automates business finances using Excel, PostgreSQL database, and Python saving me an estimated three hours every week
- Oversees all client scheduling, website, and marketing efforts
